

APICAL TO BUILD BIODIESEL DISTILLATION PLANT

Dumai, February 2015 - PT.Sari Dumai Sejati (SDS) under Apical group is currently in the process of building an additional distillation plant that allows flexibility in producing various grades of biodiesel to fulfill local and export market demands.

The completion of this biodiesel distillation plant would allow SDS to consistently produce better quality biodiesel with specifications that meet US and European standards (EN14214/AST-MD6751). The plant capacity will be at 600 TPD and it is targeted to be completed by July 2015.
