

## **Woodfibre LNG Project Receives Approval for Export License**

**16 December 2013**

Woodfibre LNG is a subsidiary of Pacific Oil & Gas Limited, which is part of the Singapore-based RGE group of companies. RGE, also known as Royal Golden Eagle, comprises a group of world-class companies focused on resource-based manufacturing industries. Assets held by RGE companies exceed US\$15 billion with a combined workforce of 50,000 people worldwide.

Woodfibre LNG Limited is proposing the development and operation of a liquefied natural gas (LNG) production facility and floating LNG storage at the former Woodfibre Pulp and Paper Mill near Squamish. The Woodfibre LNG Project comprises construction and operation of a gas processing and liquefaction facility to produce approximately 2.1 million metric tonnes per annum of LNG, associated storage capacity of 250,000 cubic metres, and export infrastructure. The Project is owned and operated by Woodfibre LNG Limited, a privately held Canadian company based in Vancouver with an office in Calgary and a Community Office in Squamish.

The Woodfibre LNG project received approval from the National Energy Board (NEB) for an export license and for more information, please click on this link: <http://www.neb-one.gc.ca/pplctnflng/mjrpp/lngxprt/cnc/index-eng.html> For more information, please visit:
