

## **The Rainforest Alliance – APRIL Collaboration**

The Rainforest Alliance, an international non-profit organisation with a mission to conserve biodiversity and ensure sustainable livelihoods, and Asia Pacific Resources International Limited (APRIL) are currently engaged in a collaboration to examine and address fundamental ways in which APRIL can improve its forest and community operations in Indonesia at the field level. This collaboration is in line with APRIL's implementation of its Sustainable Forest Management Policy 2.0.

The Rainforest Alliance's role is focused on providing advisory support and does not include audit for certification or other purposes.
